

Serial Number User Information

The Serial Number Listings on the following pages are sorted in the following order:

1) TYPE of Machine

2) Manufacturer Name

This will generally be the name of the manufacturer at the time of production rather than the successor company.

3) Model Number

Variations of models may have a footnote.

We have included all model years and beginning serial numbers made available to us at press time. The serial number lists show the number for the first piece of equipment built for each model year or the pattern for that particular model year.

Note: Serial numbers may not necessarily be the first numbers displayed on the serial number plate but will be the ending number sequence.

Iron Solutions has taken great care in the compilation of this information, however we cannot assume any liability or make an absolute guarantee of the accuracy. The numbers are provided as a guide and reference only.
